

# Our Vision

---

We believe that every student has the potential to self-fund their own Supervised Agriculture Experience Project (SAEP) and partake in the leadership, growth and success that come with their enterprise.

# About Our Program

“Jumpstart,” is a program that provides students with the resources to obtain a project at little or no cost that will be showcased and marketed at their county fair. After receiving their premium, they will have the capital necessary to self-fund their future enterprises. This will allow them to learn responsibly and integrity through hands-on, agricultural experiences. Please browse this pamphlet, visit our website, or contact us to learn more!

## *Partner*

Become a partner and we will contact you with a list of students in need of your assistance to “Jumpstart” their projects!

## *Pledge*

Want to provide a specific number of resources for our applicants? Pledge your amount and we will contact you with a student that fits!

## *Give*

Looking to contribute to our cause? Monetary donations will assist us in purchasing materials, resources, and providing scholarships for students.

# Our Services

## SAE Scholarship

Through connecting with sponsors, this program will allow students to self-fund their future SAEs using the income from their initial project from Jumpstart.

## Recovery

If students experience a problem with their SAE (loss, death, etc), we will contact our partners to assist in continuing their project.

## Scholarship

For high school agriculture programs that use our program, we will provide a scholarship for senior students choosing to pursue a degree in agriculture.
